MANAGER'S LINE: *Power Service, Inc.* *Announcing New Website Launch*

Power Service, Inc. is proud to announce the launch of our new website – <http://www.powerserviceinc.com>! After countless hours, content research and user testing we have launched a website that is geared towards the visitors interested in learning more about our company. The

to check it out often. We encourage our readers to provide us with any comments/feedback about the website by emailing netop@powerserviceinc.com.

During the course of developing our website, Power Service has also launched a new marketing campaign focused on further building our brand name with the “Power Service Difference” emblem. You will see this emblem show up more and more with our printed and web materials while we expand the reach of this campaign. We set ourselves apart from the competition because our customers are life-long patrons and believe in what we do. Our customers can count on us for any product, part, repair or fabrication project.

website features an extensive fabrication photo gallery, contact information for all our branches, PDF credit applications, safety information, and even an archive of our newsletters.

As our company grows, our website will continue to evolve with us. A few additions to the website currently in development include: video AutoCAD walkthroughs, in-depth product information and virtual tours of our facilities, just to name a few. Also, we are currently looking into starting an e-newsletter similar to this one that will feature product/fabrication project highlights and announcements delivered to your inbox monthly. Our website is updated at least once a week, so be sure

Call us today (800-743-4774) and let us show you the Power Service Difference!

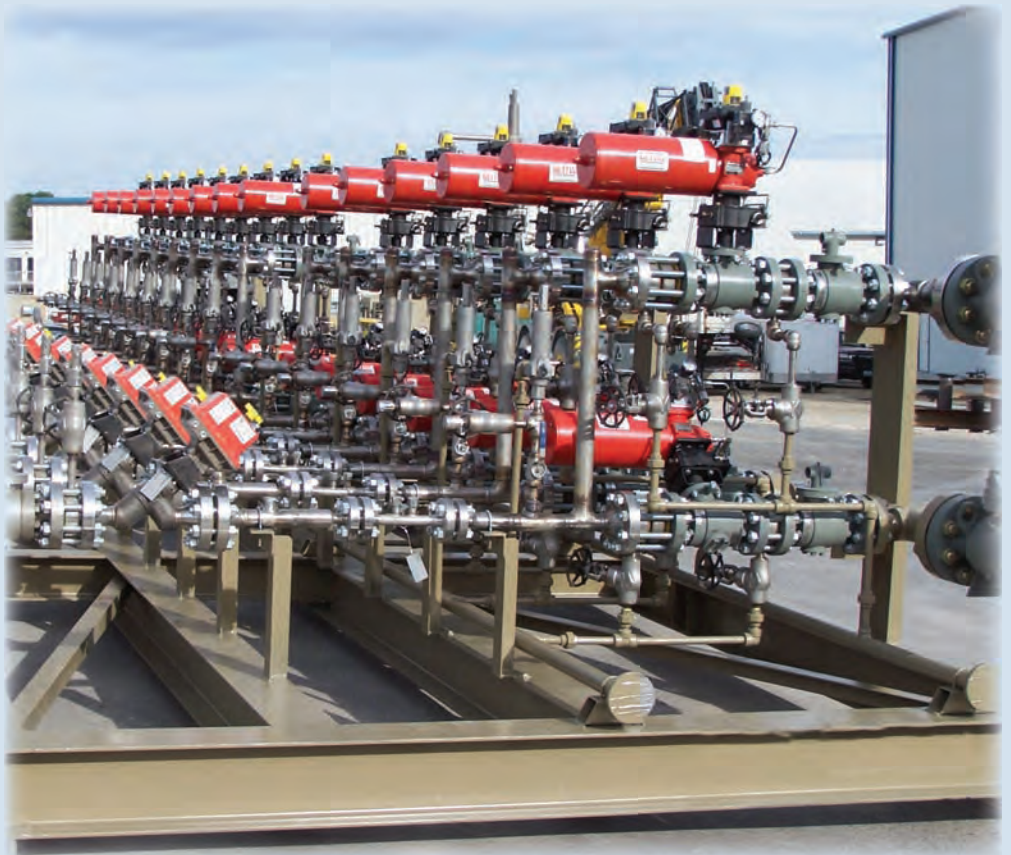

FABRICATION LINE: CO₂ Injection Manifolds

CO₂ Enhanced Oil Recovery “EOR” or “CO₂ Flooding” has been around for many years, especially in the Rocky Mountain Region where CO₂ is abundant. With Power Service, Inc.’s recent expansions of our new 20,000 sq/ft welding & fabrication facility, along with our ASME Code welding and piping shop, we used our increase production capabilities to expand into this market further.

We recently fabricated two large CO₂ Injection Manifold Skid Assemblies for a Major Oil & Gas Exploration and Production Company in SW Wyoming. The project consisted of ½” – 4” 316SS and Carbon Pipe and fittings, welded to B31.3 specifications and included Hydro Testing at over 4000 psig, as well as 100% X-Ray.

If your company has a need for this type of Manifold Piping System, Power Service, Inc. is a call away for complete design, engineering, fabrication & transportation.

Contact Erik Alberts @ 1-800-743-4774 x238 or ealberts@powerserviceinc.com, for more information.

ANNOUNCEMENTS: *Power Service, Inc.*

A Big Thank You goes out to all of our Employees and Vendors that made it to our End of Year Sales Meeting in Las Vegas. The NYNY Hotel & Casino was a great place for all of our events. Fun was had by all!

Rory Alton from our Casper Store had a booth in the CBM Fair in Gillette, WY. He had a great response from all that attended the 2 day expo.

Power Service, Inc. participated in the 2010 Rocky Mountain Wildcatters Golf Tournament again this year. The tournament was July 17th thru July 20th in Casper, WY. Jake Hagar, Micky McCoy, Cole Cercy, Rory Alton, and Jake Miskimins represented Power Service, Inc. again this year. We have a large trophy to commemorate their efforts this year! Cole Cercy ended up in first place! Congratulations!

Power Service of Montana and North Dakota participated in the Williston-Basin Petroleum Conference this year. It was in Bismark, ND. We had an outdoor booth with some of our equipment on site. This year's conference had over 4000 attendees.

Power Service of Montana has added another service technician to their staff. With the addition of Trent Belston, we will be able to help serve all of our customers' needs in a more timely matter.

In our Casper, WY. Store, Dennis Olson has taken a new position as Field Service Manager. Dennis has been with Power Service since 2000. He has a staff of 6 field service technicians that travel the state to help with service and maintenance or repair on all equipment.
