MANAGER'S LINE: *Power Service of Green River, Inc.*

At Power Service we pride ourselves on unsurpassed customer service and support. Our Green River branch is no exception. With two full time inside sales people and a large customized inventory, we are able to meet the distinctive needs of our Southwest Wyoming customer base.

Our branch location is in the unique position of being able to access all of the resources of our larger stores to provide field service, as well as, custom engineering and packaging capabilities, while still providing attentive, local support to our customers.

We strive to be the supplier of choice to our valued patrons through continued employee training, product knowledge, and 24-hour response.

Whether your looking for pumps,

compressors, or a custom designed turnkey facility, Power Service welcomes the opportunity to showcase our services and technical expertise.

Jessica, Alex and myself look forward to hearing from you and working with you in the near future! Whatever your needs, we all work together to make it happen!

Alex Reier, Jeremy Olson (Manager Power Service of Green River), and Jessica Cummins

FABRICATION LINE: New Fabrication Facility Increases

These are exciting times here at Power Service, Inc. This past year (2006) Power Service recorded sales and growth just above 25% over 2005 numbers. Our growth is not only due to the superior products that we represent but the added value we are able to provide. Due to the up-turn in business the last 18-20 months, we elected to

expand our operation. The result is a 10,000 square foot "Fabrication Facility." This first addition to our Casper, Wyoming location has been a long awaited building is equipped with (2) 15 Ton wire rope, variable speed electric hoist, that includes two 65 foot horizontal bridges. The building is completely insulated with 24' eve height side wall, that allows for a 19.5' hoist hook height (2) 24' x 20' electric overhead doors, and (2) 10' x 14' electric overhead doors. The building

includes a 400 amp 3 phase service, with superior interior lighting and three NEW state of the art welding stations. With the addition of this facility Power Service has increased our productivity in producing complete turnkey, water injection, chemical feed, and instrument and utility air skids by as much as 25%.

This first addition to our Casper, Wyoming location has been a long awaited building is equipped with (2) 15 Ton wire rope, variable speed electric hoist, that includes two 65 foot horizontal bridges. The building is completely insulated with 24' eve height side wall, that allows for a 19.5' hoist hook height (2) 24' x 20' electric overhead doors, and (2) 10' x 14' electric overhead doors. The building

Please stop by 5625 West Yellowstone Highway, Casper, Wyoming for a tour of our new facility.

Atlas Copco Quality Air Products

PRODUCT LINE

Atlas Copco offers a complete line of Quality Air Products comprised of dryers, filters, drains, water separators and airnet piping. Each one of these products is specifically designed to handle the contaminating and corrosive effects of moisture in compressed air networks. By continuing the same design excellence and efficiencies provided in all our compressors, our quality air products are the perfect solution to maintaining the integrity of any compressed air system.

Through a complete collection of refrigerated, Desiccant and Membrane dryers, AC can provide pressure dewpoints from 39°F to -40°F to -100°F.

Refrigerant Dryers, FD, FX

Desiccant Dryers, CD

Membrane Dryers, SD

Drains, EWD

Once these dryers have eliminated the AIRnet moisture, a full compliment of electronic water drains and oil/water separators convey that moisture away from the system.

Seperators, OSC

Filters

Add to this a complete compliment of coalescing and particulate filters and all of the detrimental effects of moisture in compressed air can be eliminated.

Finally, the new AIRnet compressed air piping system will make you network installation easier, less expensive and far more flexible than earlier pipe systems.

As summer approaches, do yourself a favor and check out the state of your dryers and filters before it's too late. Atlas Copco's Quality Air Products can help avoid AIRnet system failures brought on by high temperatures before it happens. Call one of the Power Service locations nearest you for more information.

ANNOUNCEMENTS:

Power Service, Inc. started 2007 off with a few new employees. Ann Ginder was hired as the new Administrative Coordinator. Ann has been in Casper for 25 years. She will be a great asset to our company. You can reach her at (307) 472-7722 ext.240. Welcome aboard!

We also welcome to our Colorado Store: Jennifer Gilmore and Adam Murray who are Outside Salesmen. Our Utah Store: Val Whitehead who is an Outside Salesman. Our Montana Store: Orie Dossdall who is a Service Tech. Our Casper Store: Eric Rice, Inside Sales, and Jeremy Barclay who is a Service Tech. Great to have you all as part of the company!

Our Vice President, Jake Hagar and his wife Pam, welcomed a new addition to their family on Nov. 13, 2006. Tanner Jacob Hagar is welcomed by big brother Brennan (7) and big sister Megan (2). Congratulations!

We are gearing up for our end of the Year Sales Meeting and Awards Banquet to be held in Casper, WY. We are all looking forward to hosting the event at our company's headquarters. All managers, outside salesmen, and inside salesmen will be present to help celebrate all of our company's successes from 2006. Some of our vendors will also be present to help with our celebration.
